This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): It is recommended that a separation of duties is implemented to ensure that no one individual has access to too many areas. Stricter password policies, and a password management system be put in place in order to verify that proper password requirements are being enforced. Disaster recovery plans need to be put in place in order to be in compliance with the E.U. and to protect customers from possible breaches. An IDS system needs to be put in place in order to detect unwanted access to certain data that is caught and dealt with in a timely manner, and all sensitive data needs to be backed up and encrypted for the customer's privacy.
